

Basic Details of the Team and Problem Statement

Organization: Novacle Technologies

PS Code: SBHRCCIIT007

Problem Statement Title: Incubation centres are not well equipped to host next generation entrepreneurs, yet.

Team Name: Campuspace

Team Leader Name: Samadrit Das

Institute Code (AISHE): 127

Institute Name: Narula Institute of Technology

Theme Name: Smart Education

Idea/Approach Details

The platform will provide a collaborative environment for entrepreneurs and incubation centers to interact and exchange ideas:

- Providing access to relevant resources such as mentorship, funding, and business support to the entrepreneurs through the platform.

- Developing a rating system that allows entrepreneurs to rate the incubation centers based on their experiences, which would help in improving the quality of the incubation centers and their services.

- It should include features such as messaging, forums, and video conferencing.

- Creating a dashboard to monitor the usage of the platform and gather data for further analysis and improvement.

Entrepreneurs and mentors could create profiles on the platform, which would include information about their experience, areas of expertise, and the types of resources they are looking for or offering.

The platform could use algorithms to match entrepreneurs with the mentors and resources based on profile info and specifications.

The platform could have a directory of resources available to entrepreneurs, such as funding opportunities, legal and accounting services, and access to lab facilities or equipment.

Platform can include communication tools such as messaging or video conferencing, so that entrepreneurs and mentors can connect.

The platform could allow entrepreneurs and mentors to track their progress over time, such as milestones achieved or resources utilized, to help them stay on track and measure their success.

The platform can include feedback and review system, where entrepreneurs can rate each other based on their experience of working together.

Tech Stack:

Idea/Approach Details

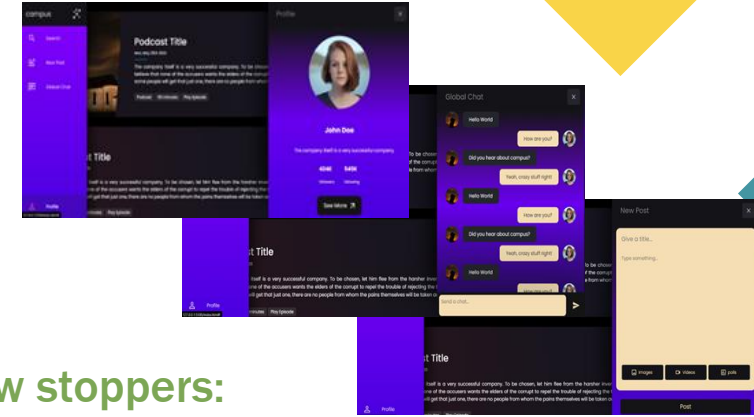

Use cases:

For Entrepreneurs:

- Finding suitable incubation centers based on their needs and requirements
- Accessing resources such as mentorship, funding, and business support
- Networking and collaborating with other entrepreneurs and experts in the industry

For Incubation Centers:

- Attracting and identifying potential entrepreneurs to work with
- Showcasing their available resources and services to the entrepreneurs.
- Receiving feedback from the entrepreneurs on their experiences with the incubation centers

Show stoppers:

- Providing a customized experience for the entrepreneurs by personalizing the content based on their interests, preferences, and needs.
- Integrating the platform with social media platforms to increase the reach and visibility of the incubation centers and the entrepreneurs.
- Ensuring the security and privacy of the data by implementing robust security measures and complying with data protection regulations.
